

Police vs. Justice: The War Goes On

Most obviously the government is running out of luck. After their last cover-up fiasco of Carpentras, the police are all out for another even bigger political scandal: A spiritual healer whom they accuse of fraud and financing the French right-wing.

Commissioner Bertrand, in charge of the Fourth Judiciary section, is a typical leftist and service lickspittle. Without any sort of legal evidence, the Commissioner attempted to coerce, by a threatening letter which he sent in person to one hundred of the former patients for them to sue the Spiritual healer, or else. In the wake of such an operation, the most famous journalist in France was arrested just because he contributed to helping the Spiritual Healer reach television celebrity fame.... No doubt that, in the mind of the police, after such unprecedented events, an avalanche of complaints against the Spiritual Healer should be a done deal! Unfortunately for them, one year later, the police are still unsuccessful.

Actually they are worse than unsuccessful since all the inquiries into the spiritual Healer's accounting could not find anything fraudulent at all. In the same time period, a support committee of more than one hundred patients totally healed by him has arisen spontaneously. And the journalist proved legally that there has never been anything fraudulent in his own involvement:

Then the suspicion that the Spiritual Healer was financing some radical right-wing has now turned into a gigantic joke since most of the Spiritual Healers' money went to Israel to support environmentalist organizations. After such a political fiasco, the Fourth Judiciary Section is called the "Fourth scumbag brigade" by the French Judges who didn't appreciate at all the whole machination.

Worse indeed for the police, the judges have released horrible information about the investigative magistrate who is a puppet in the hands of the police: This magistrate is a fanatical catholic with strong ties with the neo-Nazis who previously helped the Nazi war criminal, Paul Touvier, to escape.... Before he undertook a political conspiracy, maybe the commissioner should have taken a good look at the secret files of the French political police.
