

September 7, 2006

Two weeks ago on August 24, 2006, I arranged for Philip Savage to take care of my neighbour's horse, Paddy, which he did, bringing about the most dramatic restoration of life that I have ever seen !

I had been riding and exercising Paddy for months, until 3 years ago when he was so badly crippled with arthritis and tormented by Sweet Itch (allergy to midges), which he had suffered all his life, that it was too painful for him to move much. Now at 20 years old, most owners and vets recommended that he should be put down, to end the horrible pain in his arthritic legs and uncontrollable itching all over that left him with scabs, open sores, thick hard skin and a severe loss of mane and tail. Paddy was shrunken, miserable and barely able to move for lameness, with a staring coat and a permanently resigned grimace on his face.

Today, just two weeks after Philip's help, Paddy is pain-free, racing with Dolly, his three year old companion, displaying an impossible transformation and improving dramatically every day. He has regained his original size, stature and musculature of a heavy Irish Cob. His coat and skin are now totally restored, his eyes are shining and keen, and his mane and tail are longer and bushier than I have ever seen them ! He can now be ridden and exercised daily and does so with amazing agility, dynamism, and a youthful zest for life. He runs all over the field with energy, enthusiasm... and great beauty -- which before was totally impossible for him !

Before Philip Savage took care of Paddy, I invited a few dozen people to view this poor horse so that AFTER Philip's processing, these people could witness something that they would never believe unless they saw it with their own eyes. For two weeks, these (very fortunate) people have been coming back to view the horse AFTER Philip's treatment. Oh, yes, everyone is AMAZED, wiping their eyes, jaws dropped and virtually speechless. "Wow" is repeated over and over. So are comments like, "Before he looked at least 28; now he looks half his age". Some proclaim him to be "a totally different horse" !

My grandmother, a renowned horsewoman who lives hundreds of miles away, asked that we take BEFORE and AFTER videos of Paddy so she could see what happened without coming in person. We did that and now with such a DRAMATIC VISUAL documentation of Paddy's "miracle", which, please notice, was SCHEDULED, anyone can see for themselves the life-saving transformation. They can recommend Philip Savage to EVERYONE, and help relieve SO MUCH UNNECESSARY SUFFERING in the UK and in America ... wherever there are animals that the owners and the vets have to "put down" because there's no other hope.

NOW THERE IS HOPE... for them and for US ! (Soon also, there will be a lot of people calling to tell me, "Rosie, you were right ! . . . That will be a fantastic reward for me !)
