

The Unprecedented Science of Subliminal Distant Influentiality

"I cannot think of a person (or a group of persons working together toward a specific goal or toward some material outcome) who would not benefit from using my 'subliminal influence technologies,' to bring about a complete change of attitude (political, commercial, or personal) of some targeted individual or individuals."

Dr. Philip Savage, Ph.D., Father of the Science of Subliminal Distant Influentiality (SDI)

Dr. Savage's science of subliminal influentiality is based on the fact that all living things are deeply embedded into a unified field of global consciousness, the "psycho-continuum." Somewhat related to the most advanced concepts of quantum mechanics (inseparability and a-locality), Jungian theory (synchronicity and collective unconscious), theories of morphogenetic fields (Sheldrake) and psychofields (Kaznatcheiev), Dr. Savage's advanced "science of the unconscious" has been extensively tested, understood and applicable.

With SDI (Subliminal Distant Influence) technologies, Philip Savage is capable of doing "impossible" things anywhere in the world, from a distance, with unprecedented and precise results. In his words, his unique ability to "break into the psycho-continuum" allows him to "surf in it with excellent accuracy" and eventually "reconfigure it" (remotely) according to specific purposes, authorized by his private clients.

DOCUMENTED RESULTS: "People actively exposed to my subliminal procedure are DRIVEN to do, unconsciously, things they otherwise would NOT do, or vice versa, NOT do things they otherwise would do."

DRAMATIC EXAMPLES OF THE PRACTICAL EFFECTS OF SDI ON TARGETED SUBJECTS:

- Politicians, witnesses, informants are COMPELLED to tell the truth.
- Despots, rogue rulers, abusive leaders are COMPELLED to "step down."
- Terrorists, criminals, junta rebels are COMPELLED to "make mistakes" and get captured.
- Athletes and racehorses subjected to "subliminal neuro-bypass" (on-the-spot "legal steroids") WIN their races.
- Field Agents get "ENHANCED" and events get "rearranged," so they quickly and successfully finish their missions.
- SECURITY and protection (from a distance, anywhere in the world) for celebrities, businesspersons, dignitaries (and their children), absolutely unavailable from any other "personal security service."
- REMOVAL of threats to families and businesses: drug dealers, unfaithful "friends," cult members or "bad" influences; dishonest employees, partners or advisors; competitors. (All get "removed" in ways that benefit everyone involved).
- Emergency "PROTECTION PLAN" (and accelerated recovery) for clients involved in accidents, injuries, sudden attacks (from terrorist, criminal, biological, or fire, heart attacks, drug overdoses), in addition to other health crises.
- Morphogenetic Transformation (MCC): Large groups of criminals (mobsters, murderers, thieves) are "SUBLIMINALLY READJUSTED" in ways that dramatically reduce crime rates and public fear, thereby increasing productivity and well-being in residential communities, cities, states and governments. (Expanded DIGITAL implementation of MCC can potentially deliver these astonishing positive effects at the global level).

A FEW EXTRAORDINARY FEATURES OF SDI TECHNOLOGIES (SUBLIMINAL DISTANT INFLUENTIALITY):

- There are no "anti-subliminal" counter-measures. The "targeted individual(s) cannot avoid the ineluctable (but unconscious) taking over of his or her most essential centers of decision (both intellectual and emotional), and cannot escape his/her own neuro-behavioral recalibration according to the predefined specific objective."
- Precisely because it is subliminal and distant, SDI far exceeds any known system in the world. With SDI the entire "implant" operation is achieved without any traceable procedure of psycho-suggestion – it cannot be "discovered" -- and, therefore, it does not carry the potential danger to the programmer of later memory retrieval by skilled hypnosis experts. SDI is uniquely valuable because "it leaves no tracks."
- The practical outcome of being exposed to SDI is the same for all subjects: a partial or complete "brain-reset," involving major readjustments in the neurological centers of decision-making processes. Depending on the specific assignment authorized by the client, all subjects soon demonstrate some form of deep psycho-behavioral change, with dramatic consequences in their professional, legal, political and familial circumstances.
- Detailed information about classified assignments is NOT required for successful use of SDI. Clients provide only minimal coordinates to begin the process, followed by "local feedback", until the specific assignment is completed.

SDI HAS NO COMPETITOR IN THE WORLD. It constitutes the most powerful (and exclusive) technology in existence today, forming a complete and insurmountable non-lethal weapons system. SDI provides unmitigated hope for a peaceful, swift, and irreversible solution to any conflict -- national, international, personal, political or economic.

The Washington Post in 2001 highlighted the value of Dr. Savage's SDI technology, an unprecedented "remote doing" weapon, in the war against terrorism: *"It was a weapon with varied and highly relevant powers: To make reluctant witnesses talk, to heal burn victims. Not a bomber or a vaccine but a man, or more like a superman, named Philippe Sauvage...."*

Application of SDI is precise, efficient and certain with laser-like results. Its uses are unlimited in the fields of health, business, law, government, politics, ecology, criminology, economics, and private and international security.

- **Health: Bio-Restoration** of patients, including animals, suffering or dying from any kind of disease, including so-called incurable ones. **Rejuvenation**, whereby the degenerative aging process is reversed. **Recovery** of individuals, families, groups from any trauma, crisis or threat: i.e. victims of rape, genetic defects, children's problems/retardation, cult abductions, drug dependency/addiction, fire burn, viral epidemic. **(Ethiatrics)**
- **Enhancement and Optimization of active people:** Athletes, CEOs, racehorses, military -- anyone in competition to "win" -- get a partial or complete "brain reset" (a new existential "blank slate"), depending on the individual's need, resulting in actualization of their greatest aspirations to, "Be all that you can be."
- **Morphogenic Cybernetics (MCC):** Digitally blending the DNA and morphic images of many different persons in order to bring about the exact results predefined by the client (in fields such as criminology, business, politics, military, law, and security). For the first time, now that advanced morphing computer systems and digital science experts are trained and available for hire, the world's only Cybernetician is able to carry out previously unattainable huge-scale projects. **(Societrics)**
- **Counter-Terrorism:** Besides the obvious relief in cases of people suffering and dying from individual health crises (cancer, AIDS, Alzheimer's, etc.), Philip Savage's SDI and MCC can provide a "**Bio-Shield**" in the case of viral epidemics and an immediate "**emergency response**" task force in the case of fire burn (from any source, including international terrorist attacks or biological warfare).

RESULTS OF DR. PHILIP SAVAGE'S advanced science and technology of Subliminal Distant Influentiality have been documented for more than 25 years in laboratories, universities and private cases in Europe and America on thousands of people and animals, especially in the field of health recoveries, many of which are public information available on various websites. (Dramatic results in the fields of politics, economics, criminology, and security that involve remotely "changing" people's minds are confidential and obtainable only through personal consultation.)

Dr. Philip Savage has demonstrated his SDI technology on severe fire-burn victims, anytime, anywhere in the world, "on cue," and for free. When done within the first few minutes of exposure to fire, the results are so dramatic they defy all known limits. Once these results are globally recognized, Dr. Savage will follow with scientific testing in increasingly more complex protocols, including the cellular and microbiological domains. While he is not permitted to use his technology within human activities without authorization and justification from clients, when conditions are met, Philip Savage is able to produce for those clients the most astonishing results that anyone has ever seen.

Using SDI and MCC on a global scale in a variety of domains will accomplish humanity's deepest, most immediate needs, as well as Dr. Savage's only agenda -- forcing a shift in human thinking that will change the world.

SDI TECHNOLOGY IS WITHIN THE FINANCIAL REACH OF THOSE WHO CAN MOST AFFORD TO USE IT:

People who are suffering or dying of terminal illnesses; individuals and businesses worried about personal and economic losses; activists and governments that are facing insurmountable challenges; people who are determined to control, influence or beat their competition any way they can. These people use Philip Savage's exclusive technology for their own advantage in any way they choose. In exchange, those private clients have the chance to contribute to the most valuable and ultimate project of Dr. Savage's entire life.

What matters most about SDI is that it is tested and it works! Highly controversial (from a philosophical and ethical point of view), nevertheless Dr. Philip Savage's SDI technology is the "secret weapon" we have all been wishing for. Its extraordinary value and easy availability to private individuals, as well as governments, makes this unprecedented subliminal power vital for the welfare of the world and the future of Life on the planet.
